6P

1. Enclosed find copies of ZIPPER memo 1002, 1003, and 1004.
2. The case in its current stage of reporting still requires much clarification, but we are passing it on primarily for the edification of Vienna.
3. Franz HASCHKA, former V-MAN, is the primary figure in this case. UN notes that as a ZIPPERite HASCHKA displayed great political ambitions, and seemed to be susceptible to united German propaganda from East Germany.
4. UN reports on the following connections of HASCHKA's which he believes to be most suspicious.
  - a. Surveillances by UN have shown that HASCHKA is in contact with the circle surrounding Josef URBAN. UN has long regarded URBAN as at least being heavily infiltrated by enemy services. Exactly which members of the URBAN group are in contact with HASCHKA has not been reported.
  - b. HASCHKA has also been in contact with Johann FLEISCHACKER and Vienna police official, Walter KEEHART. UN reports that the latter two are most suspicious of being enemy agents and are in turn in contact with one Jan PSENICKA, a Czech refugee, who in the past has worked for the SRES in Vienna. FLEISCHACKER, KEEHART, and PSENICKA claim to have contact with opposition MVD elements, which are in the position of getting captives released from Siberian prison camps. The latter have reportedly been attempting to establish contacts with Western services by offering this contact.

(1) POB traces on FLEISCHACKER appear in EASA-2341, 22 Oct 1953. Here a Josef FLEISCHACKER, living at the same address as subj., att 1, is described as being a former member of the KPOs, the Polish underground (during WW II), and as one who has aided the anti-communist underground in Austria with money. In 1951 he was reportedly employed by CIC Vienna to whom he supplied reports on the SRES which proved to be either of little value or false. Another unofficial memo, 20 April 1953, in our files states that one Josef FLEISCHACKER, a well known fabricator in Vienna, had failed an LCPLUTER test, but was known by EDUFFY. Subject
